DETAILED ACTION

This Office Action is responsive to the Preliminary Amendment filed on October 18, 2004.

Status of Claims

Claims 1-89 are pending.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I – appears to relate to Claims 1-4, 6, 30 and 32-34 (noting the inclusion of a desired depth limitation)

Species II – appears to relate to Claims 1, 11 and 37-39 (noting the inclusion of crystal damage or amorphization)

Species III – appears to relate to Claims 1, 12-14 and 35 (noting the inclusion of dielectric surface enhancement)

Species IV – appears to relate to Claims 1, 7-10, 15-21, 31, 40-43 and 75 (noting the inclusion of a passivation process gas)

Species V – appears to relate to Claims 1 and 22-25 (noting the inclusion of a pre-cleaning wafer step)

Species VI – appears to relate to Claims 1, 26-29, 83 and 84 (noting the inclusion of a annealing step)

Art Unit: 2813

Species VII – appears to relate to Claims 1 and 36 (noting the inclusion of plural dielectric gates)

Species VIII – appears to relate to Claims 1 and 44-51 (noting the inclusion of RF or DC bias power)

Species IX – appears to relate to Claims 1 and 52-55 (noting the inclusion of single burst bias power)

Species X – appears to relate to Claims 1, 5 and 56-62 (noting the inclusion of a bias frequency)

Species XI – appears to relate to Claims 1 and 63-73 (noting the inclusion of first and second atomic elements)

Species XII – appears to relate to Claims 1, 74, 76 and 86 (noting the inclusion of chamber cleaning)

Species XIII – appears to relate to Claims 1 and 77 (noting the inclusion of an optical metrology chamber)

Species XIV – appears to relate to Claims 1 and 78-82 (noting the inclusion of an ion beam apparatus)

Species XV – appears to relate to Claims 1 and 85 (noting the inclusion of a photoresist strip chamber)

Species XVI – appears to relate to Claims 1 and 87-89 (noting the inclusion of a second plasma immersion ion implant reactor)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2813

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David L. Hogans whose telephone number is (571) 272-1691. The examiner can normally be reached on M-F (7:30-4:30).
